

Step Into The Light

Verse (Solo)

Take a look in your heart
There is something that is waiting for another day
Could we make a new start?
'Cos I'm hoping that we can find a different way

All this time we've been hiding in corners
Keeping our eyes closed
Refusing to go outside
All this time we've been running in circles
And every day we seem to be in the same place

Chorus (All)

**But now it's time to go outside
The future's been waiting
And there is no need to hide
Even if tomorrow's like a dream
It makes the new day all worth waiting for**

**So tell me what you want now,
Show me what it looks like
Hope is not a black hole
So step into the light**

**Dreaming is a good thing
One day you will wake up
Walk out of you doorway
And step into the Light**

Verse 2 (Solo)

Life is kind of cosy
When you're sitting inside observing people passing by
When the rain is falling
It is easier to close all of the doors inside your heart

But come on! You can live out your life,
You can rise with the sun
You can walk out and take it all in
When you wake from the shadows and darkness
You'll step through the door and walk into your freedom

Chorus as above (All)
