

# **Out There**

## **Narration 1**

**(Narrated)**

Here we are in the year 2273 and how far have we come? The seas are polluted so we cannot eat fish. The land is contaminated so we can barely eat the crops. The air is so bad you can hardly breathe. Wildlife is disappearing and trees are hacked down as we crave land for industry. But our Master and Leader, Zachary, says he is in control. We have to live the lie that everything is just fine!

**(Through speakers - recorded)**

*Comrades, I am addressing you all from the Citadel of Power. Do not be alarmed ... but we need to reduce the number of people on the planet. Because of rising sea levels, we have already lost **so** much land around our great cities that there is no longer room for everyone. You must always remember; we have come a very long way under my leadership. You, my true followers, must keep working hard in **all** your duties if we are to overcome our problems. I am depending on your loyalty so that we can all succeed. However, there are still a few people who are working **against** my power and **our** regime. These are the ones we need to lose. They do not believe in my leadership or the great things I have promised. We, together, must root them out and bring them to justice, then remove them. There are no alternatives. I am asking that you help me to find out who they are. To them, you must be my weapons of destruction. We now have the media under complete control so there will be no more fake news. We have increased our special neighbourhood police as well as internet agents.*

*My way is the best and you are completely safe under my control. Love and sympathy have no place in **my** world. Before you think of yourself, think of me. That is all you need to do. If I am to build a 'Super-Race' to give you a better future, believe me, I will not tolerate opposition of any kind.*

**(Narrated)**

My family and friends are amongst those he wants to destroy. This earth seems near its end but what can we do? If we do not live on this planet, where can we go? Zachary wants us to believe his every word but what he says is not true, and yet, if we hide from the truth, we will never come to terms with the problem.

**Song – Requiem for the End of Time**
