

Stars

Words and Music © Paul J Burrell 2020

(Solo)

Out in the universe, millions of stars
Each one a precious jewel, sparkling both near and far
Message of hope is there every time they shine
I feel so weak and very small until I think of stars
Now that I see these stars

Chorus (All)

**Shine out with an everlasting light
Sparkle in my dreams
Chase away the shadows of the night
So that I think of stars
Now that I see these stars**

(Solo)

Stars take my breath away, fill me with awe
Lifting my hopes and dreams so I can trust for sure
Strength to fight on with faith rises in my heart
I'll take my courage in my hands now that I think of stars
Now that I see these stars

Chorus (All)

**Shine out with an everlasting light
Sparkle in my dreams
Chase away the shadows of the night
So that I think of stars
Now that I see these stars**

**Shine out with an everlasting light
Sparkle in my dreams
Chase away the shadows of the night
So that I think of stars
Now that I see these stars**

(Solo)

Now that I see these stars
